XR TL

X - A price action is being formed by 2 TL.
R - Rotation of TL to find appropriate angle.

2 TRENDLINE (R+S) are used in this method to identify:

1. Trend and direction in the short or long term.
2. The possibility of price momentum

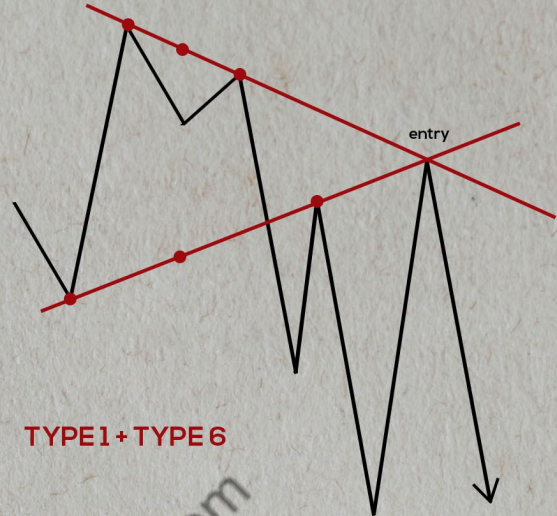

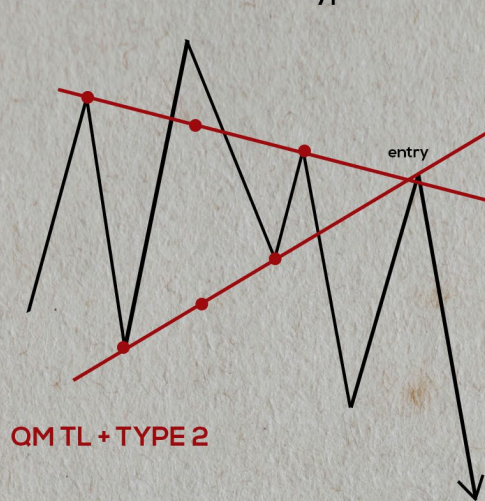

*This is the trade secret that I employ on a daily basis.

6 TYPES OF TRENDLINE

XR TL - BOOM POINT

*Combination of different types of TL

If you can't see the TL in the same TF, please use 2 TF.

PSYCOLOGY

WHY MOST TRADER LOSE?

What you've just learned is that Technical Analysis for only 10% of trading, the rest is made up of psychology and system, or 'how you trade.'
If you trade like a pro but never received sufficient psychology training, you will continue to lose your money.

"Trading is reflection of you."

1. Mentality

- *Whether you think positively or negatively every day
- *Do you have a stable emotional state?

2. Human behaviour

- *Do you want to be wealthy or consistent?

SYSTEM

TRIAL

- *Only use one technique is enough

ADJUST (LEARN)

- *Increase your practise time. Backtest on a regular basis.

SYSTEM

- *Repetition of the good, avoidance of the negative.

RISK & REWARDS

RISK

- *The amount of money we're willing to lose.

REWARDS

- *The amount of money we'd like to make.
